

City Parks and Landscape Areas Irrigation Schedules 7/1/22-10/1/22

Landscape Areas – All landscape areas including City-owned medians, parkways, and facilities are on a three-day schedule which is Sunday, Wednesday, and Friday nights with a water window between 10:00 p.m. and 6:00 a.m. Irrigation heads are adjusted to mainly water the existing trees, and the turf surrounding will no longer be watered. Some exceptions include newly landscaped medians and parkways that have a drip irrigation system to water new low-water use plants, and existing trees.

Parks – Any turf in Parks that is designated for recreational use, in particular, Sports Fields, family play areas, or heavily used areas for dog walking will be watered three nights per week. The water days are also Sunday, Wednesday, and Friday nights. Sports Fields' water days may vary based on the most heavily used days to avoid wet fields before a big game day to reduce unsafe conditions and possibly damage to the fields. Additionally, for safety reasons, a field may receive an extra night of watering if the soil is getting too hard or dry to play on safely. Arovista Park is an exception as it uses non-potable water from a well at the Brea Creek Golf Course. Non-potable water is not treated to drinking water standards and is not meant for human consumption. The use of non-potable water provides the City an opportunity to water extra at that park without affecting water savings.
